FUNCTIONALITY

At the **initial valuation date**, the closing price of the Erste Group share is fixed as **starting value** and the **barrier** (60% of the starting value) is determined. The starting value also represents the **termination level**. At the respective **annual valuation date**, the **closing price of the Erste Group share** is **compared to the termination level**. If the share's closing price quotes at or above the termination level at one of the annual valuation dates, the certificate is redeemed at the predefined termination price:

| TERM | TERMINATION LEVEL | TERMINATION PRICE | YIELD |
|---|-----------------------|---------------------------|--------|
| 1 st year: | 100% = starting value | 107% of the nominal value | 1 x 7% |
| 2 nd year: | 100% = starting value | 114% of the nominal value | 2 x 7% |
| 3 rd year: | 100% = starting value | 121% of the nominal value | 3 x 7% |
| 4 th year: | 100% = starting value | 128% of the nominal value | 4 x 7% |
| 5 th year: | 100% = starting value | 135% of the nominal value | 5 x 7% |
| → THE TERMINATION PRICE INCREASES WITH THE TERM | | | |

If the share quotes below the termination level at the annual valuation date, the term extends by another year (up to a maximum term of five years). At the same time, the **possible termination price increases annually by 7% of the nominal value** (up to a maximum of 135%).

If the certificate is not redeemed in the first four years and provided that the underlying quotes below the termination level at the fifth and **final valuation date**, an additional safety mechanism applies. If the share (closing price) quotes above the barrier of 60% of the starting value, **redemption is effected at 100% of the nominal value**. This means that if the share price did not decline by 40% or more compared to the starting value by the end of the term, investors obtain the nominal value of EUR 1,000 at the maturity date. If the closing price of the share is at or below the barrier at the final valuation date, **physical delivery of shares** is effected. This means the investor receives shares of Erste Group Bank AG in the **amount predefined** at the initial valuation date (= nominal value/starting value). The difference to the next whole number is paid out.

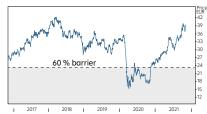

DEFINED NUMBER OF SHARES

The number of shares to be delivered is determined as follows: **number of shares = nominal value/starting value** Usually this does not result in whole numbers. Due to the fact that shares are traded in whole numbers only, in the event of physical delivery the residual value is paid out in cash (= cash settlement) according to the market value: **fraction of the shares x closing price of the share at the final valuation date = cash settlement**

The **Erste Group Express 3** certificate provides for **physical delivery** of shares. In the most unfavourable case, the investor gets shares of Erste Group Bank AG at the end of the term.

OPPORTUNITIES

- Yield opportunity: Opportunity to obtain yield if the share price remains constant or increases.
- **Possible early redemption:** Early redemption at the predefined termination price if the share quotes at or above the termination level at one of the annual valuation dates.
- · Flexibility: Tradability on secondary market, no management fees

RISKS

- Limited yield opportunity: The maximum yield is limited to 7% per year. If the share does not quote at or above the termination level at any of the five valuation dates, no (early) redemption at the predefined termination price will be effected and investors will not obtain any yield.
- Barrier violation: If the barrier is violated at the final valuation date, investors receive Erste Group shares in the amount predefined and are entirely subject to market risk, without any protective mechanism. In the event of a physical delivery, the market value of the delivered shares will be less than the nominal value. Close to the barrier, disproportionate price movements of the certificate can also occur during the term.
- Issuer risk / Bail-in: Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Base Prospectus (including any possible supplements) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the described financial instruments. The approved Base Prospectus (including any possible supplements) and the respective Final Terms have been deposited at the Oesterreichische Kontrollbank AG as the notification office. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the FMA. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of

Raiffeisen Centrobank AG (<u>www.rcb.at</u>) by entering the International Securities Identification Number (ISIN) of the respective financial instrument.

Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein.

Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wideranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at www.rcb.at/en/basag. A total loss of the invested capital is possible

The price of the Express Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Express Certificate. If the Express Certificate is sold, there is the risk to incur a substantial loss or even a total loss of the invested capital ("market risk"). The Express Certificate is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Express Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). Dividends and similar rights associated with the underlying are taken into account when structuring the Express Certificate and are not paid out.

Certificates issued by RCB are no financial products as defined in the Regulation (EU) 2019/2088.
