DESCRIPTION

Turbo Certificates enable investors to participate with a leverage effect in the performance of the underlying. Short Turbo Certificates provide investors with above average profit opportunities in falling markets. If the underlying touches or surpasses the barrier (knock-out level), the Turbo Certificate expires prematurely. The investor may incur a total loss of the invested capital.

Barrier and strike are adjusted on a daily basis. In case the underlying quotes in a currency different to that of the certificate or in case the underlying is a commodity future (roll over), a deviation may occur.
